

CUSTODIAL SERVICES

An effective cleaning program is important not only for providing a good and healthful atmosphere in which the youth of the community may learn, but is also important to prevent deterioration in school buildings.

It is the responsibility of each building principal, under the general supervision of the Facilities Director, to coordinate with his/her head custodian an efficient cleaning program.

It is the policy of the board that at the discretion of the principal a custodian must be present at all functions which take place in the school during hours when school is not in session. It is the responsibility of the custodian present to close the school at the end of the function.
