

STUDENT USE OF COMPUTERS, DEVICES AND THE INTERNET

The Goffstown School District's computers/devices, software systems, network, and Internet services are provided to support the educational mission of the District and its schools. This Policy and the accompanying responsible use regulations apply to all students' use of all District and student-owned technology devices and systems (i.e. Google G Suite for Education, Office 365, Power School, Schoology, etc.) whether used or accessed on or off school property.

The Superintendent establishes regulations for responsible technology and Internet use. Compliance with the Goffstown School District's Policies and regulations concerning computers/devices, software systems, network and Internet services use is mandatory. Students who violate these Policies and Regulations may have their privileges limited, suspended, or revoked. The Building Administrator or designee shall have the final authority to decide whether a student's privileges will be altered, based on the circumstances of the particular case. Such violations may also result in disciplinary action, referral to law enforcement and/or legal action.

Goffstown School District computers/devices, software systems, network and Internet Services remain under the control, custody, and supervision of the Goffstown School District at all times. The District monitors all computers/device and Internet activity by students. Students have no expectation of privacy in their use of computers/devices, software systems, networks, and Internet services, whether they are used or accessed on or off school property.

The Goffstown School District utilizes filtering technology designed to block materials that may be obscene or harmful to minors, and child pornography. The District takes precautions to supervise student use of the Internet and electronic communications and to prevent the unlawful disclosure, use or dissemination of personally identifiable information about students. The District educates students about safety on the Internet, appropriate online behavior and cyberbullying awareness and response. Parents/guardians should be aware that the District cannot reasonably prevent all instances of inappropriate computer/device use by students that may violate School Board Policies and Regulations including access to objectionable materials and communications.

Students and parents/guardians shall be informed of this Policy and the accompanying Regulations through student handbooks, student registration and/or other means selected by the Superintendent.

The Superintendent or their designee is responsible for implementing this Policy and the accompanying Regulations. Additional administrative procedures or school rules governing the day-to-day management and operations of the Goffstown School District's computers/devices, software systems and network may be implemented by the Superintendent, consistent with School Board Policies and regulations.
